IPUMS Global Health

Free IPUMS Survey and Census Data for International Health Research

Prepared for a 2024 CUGH pre-conference satellite session March 7, 2023 Presented by Anna Bolgrien, PhD & Mehr Munir, MA

Workshop Agenda

- Introduction to IPUMS
 - IPUMS DHS
 - IPUMS MICS
 - IPUMS PMA
 - IPUMS International (census data)
- Additional IPUMS Global Health features
- Web demonstration
- Consultations & hands-on exercises

With Support From

NIH (NIA | NICHD | NIGMS | NIEHS)

INTRODUCTION TO IPUMS

What is IPUMS?

- US & international census & survey data
- To improve data accessibility
- Integrated documentation and standardized data to streamline analysis
- Available free of charge

Microdata

Summary data

U.S. Census and American Community Survey microdata from 1850 to the present.

Current Population Survey microdata including basic monthly surveys and supplements from 1962 to the present.

World's largest collection of census microdata covering nearly 100 countries, contemporary and historical.

Health survey data for Africa and Asia, including harmonized data collections for DHS E, MICS E, and PMA E. Learn More

Tabular U.S. Census data and GIS boundary files from 1790 to the present.

Tabular and GIS data from population, housing, and agricultural censuses around the world.

Historical and contemporary time use data from 1965 to the present.

Historical and contemporary U.S. health survey data from NHIS (1963-present) and MEPS (1996-present).

U.S. data

International data

U.S. Census and American Community Survey microdata from 1850 to the present.

Current Population Survey microdata including basic monthly surveys and supplements from 1962 to the present.

World's largest collection of census microdata covering nearly 100 countries, contemporary and historical.

Health survey data for Africa and Asia, including harmonized data collections for DHS E, MICS E, and PMA E. Learn More

Tabular U.S. Census data and GIS boundary files from 1790 to the present.

Tabular and GIS data from population, housing, and agricultural censuses around the world.

Historical and contemporary time use data from 1965 to the present.

Historical and contemporary U.S. health survey data from <u>NHIS</u> (1963-present) and <u>MEPS</u> (1996-present).

Census data

Survey data

U.S. Census and American Community Survey microdata from 1850 to the present.

Current Population Survey microdata including basic monthly surveys and supplements from 1962 to the present.

World's largest collection of census microdata covering nearly 100 countries, contemporary and historical.

Health survey data for Africa and Asia, including harmonized data collections for DHS &, MICS &, and PMA &. Learn More

Tabular U.S. Census data and GIS boundary files from 1790 to the present.

Tabular and GIS data from population, housing, and agricultural censuses around the world.

Historical and contemporary time use data from 1965 to the present.

Historical and contemporary U.S. health survey data from NHIS (1963-present) and MEPS (1996-present).

Sub-state geographic detail

U.S. Census and American Community Survey microdata from 1850 to the present.

Current Population Survey microdata including basic monthly surveys and supplements from 1962 to the present.

World's largest collection of census microdata covering nearly 100 countries, contemporary and historical.

Health survey data for Africa and Asia, including harmonized data collections for DHS S, MICS S, and PMA S. Learn More

Tabular U.S. Census data and GIS boundary files from 1790 to the present.

Tabular and GIS data from population, housing, and agricultural censuses around the world.

Historical and contemporary time use data from 1965 to the present.

.

Historical and contemporary U.S. health survey data from NHIS (1963-present) and MEPS (1996-present).

GIS data

U.S. Census and American Community Survey microdata from 1850 to the present.

Current Population Survey microdata including basic monthly surveys and supplements from 1962 to the present.

World's largest collection of census microdata covering nearly 100 countries, contemporary and historical.

Health survey data for Africa and Asia, including harmonized data collections for DHS E, MICS E, and PMA E. Learn More

Tabular U.S. Census data and GIS boundary files from 1790 to the present.

Tabular and GIS data from population, housing, and agricultural censuses around the world.

Historical and contemporary time use data from 1965 to the present.

Historical and contemporary U.S. health survey data from NHIS (1963-present) and MEPS (1996-present).

Why use IPUMS?

- Integration & harmonization
- Data & documentation available via web-based dissemination system
- Create and download custom extracts
- Online data analysis tools
- Data enhancements
- User support

IPUMS Integration Process

Microdata Harmonization

- A single, consistent data series from datasets collected in different times and places
- Codes group broadly comparable categories while retaining sample-specific detail
- Denote potential comparability issues

Basics of Integration

- Consistent codes and variable names
- Thorough and accessible documentation at the variable level
 - Comparability of concepts and universes across time and/or place

Burkina Faso 2018	Kenya 2018	India 2018
0 = Never	0 = Never	0 = Never
1 = Primary	1 = Primary	1 = Primary

Data Collections

IPUMS DHS

DEMOGRAPHIC AND HEALTH SURVEYS

Integrated Demographic and Health Surveys from The DHS Program, currently covering Africa and South Asian surveys from the 1980s to the present.

GET DATA

IPUMS PMA

PERFORMANCE MONITORING FOR ACTION

Integrated PMA surveys on fertility, contraception, hygiene, and health, administered frequently to monitor trends in select high-fertility countries.

GET DATA

IPUMS MICS

MULTIPLE INDICATOR CLUSTER SURVEYS

Integrated MICS surveys covering child health and well-being.

GET DATA

mics.ipums.org

Harmonization for 900+ variables

89 countries 211 samples 1,089 datasets

Multiple Indicator Cluster Survey

Developed by UNICEF in the 1990s

To assist countries in filling data gaps on children's and women's well-being for tracking progress toward

World Summit for Children Goals

MDGs

SDGs

Advantages of using IPUMS MICS

- Comparability across time and place
 - Approximately 60% of common variables currently harmonized
- Harmonized geography
- Easily browse topics and variables
- Documentation on each variable's universe, question wording (in English), comparability issues
- Stata data files

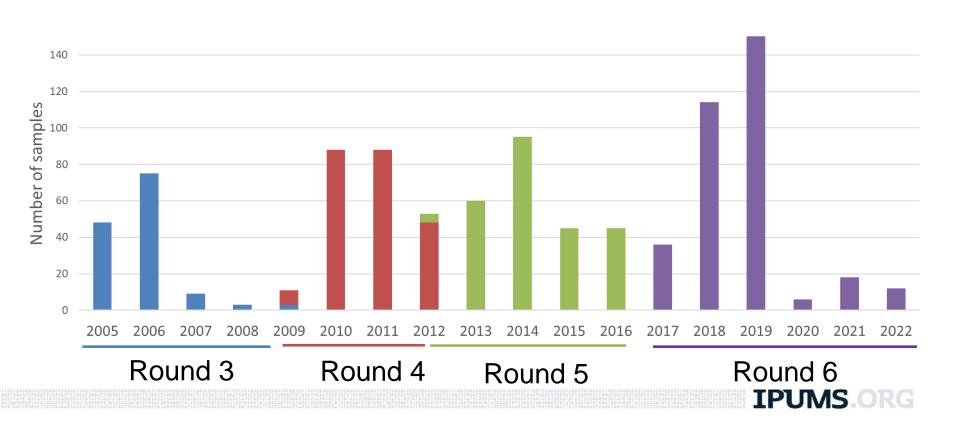

89 IPUMS MICS Countries

IPUMS MICS Samples Over Time

Sample Design

Nationally representative sample of households

Typically, around 10,000 – 30,000 HHs

Multi-stage cluster sampling of HHs

Similar to Demographic and Health Surveys (DHS)

■■MICS

HOUSEHOLD QUESTIONNAIRE

name of country

HOUSEHOLD INFORMATION PANEL	нн

Children Age 5-17 (one per HH)

Research with IPUMS MICS

- Comparative research across countries (e.g., tracking SDGs)
- Studying trends over time
- Pooling data to study small populations
 - Orphans
 - Children with particular disabilities

Newly released at IPUMS MICS

New variables

Child labor
Alcohol and tobacco use
Victimization
Household energy use
HH assets

New samples

Afghanistan 2022-2023
Fiji 2021 – NEW COUNTRY
Vietnam 2020-2021
Nigeria 2021
Uzbekistan 2021-2022
Thailand 2022
Pakistan (Balochistan) 2019-2020
Pakistan (Khyber Pakhtunkhwa) 2019

More new variables and samples will be released in Summer 2024!

dhs.ipums.org

What is the DHS?

- Demographic and Health Surveys (DHS)
- 1980's to the present
- "Collect and disseminate accurate and representative data on population, health, HIV, and nutrition"
- Over 400 surveys in more than 90 countries
- Leading source of information on health in Low and Middle Income countries (LMICs)

What is IPUMS DHS?

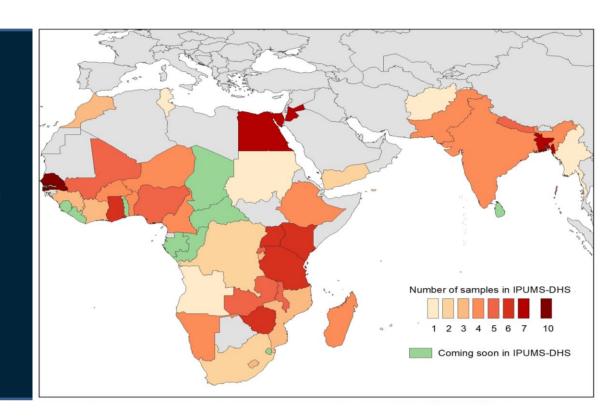

- Website with over 20,000 harmonized variables
- Microdata drawn from DHS public use files, recoded
- Consistent variable names and codes for "nonstandard" variables
- Additional features (contextual variables, reproductive calendar

Samples and Countries in IPUMS DHS

- 180 samples
- 45 countries
- Most sub-Saharan African
 - countries
- North Africa, Middle East
- South Asia

Constructing Contextual Variables in

IPUMS DHS

- Use GPS sample cluster points (displaced w/in 5-10 kilometers)
- Draw 5 or 10 km buffer zone around sample points with ARC GIS
- Bring in non-DHS information with geographic location info
- Associate that non-DHS information with all survey members in a sample cluster

More information: "Contextual data in IPUMS DHS: physical and social environment variables linked to the Demographic and Health Surveys," Population and Environment (May 2020).

Reproductive Calendar Data in IPUMS DHS

Allows study of topics such as

- Contraceptive failure rates
- Length of use, reason for stopping use of FP methods
- Prevalence of births delivered before 9 months of pregnancy
- Relationship between IPV and miscarriage
- Prevalence and timing of abortion

For more information, see "How to Use Simplified Reproductive Calendar Data from the Demographic and Health Survey," Studies in Family Planning, March 2023; Elizabeth Heger Boyle, Nir Rotem, and Miriam L. King,

IPUMS.ORG

IPUMS PMA Overview

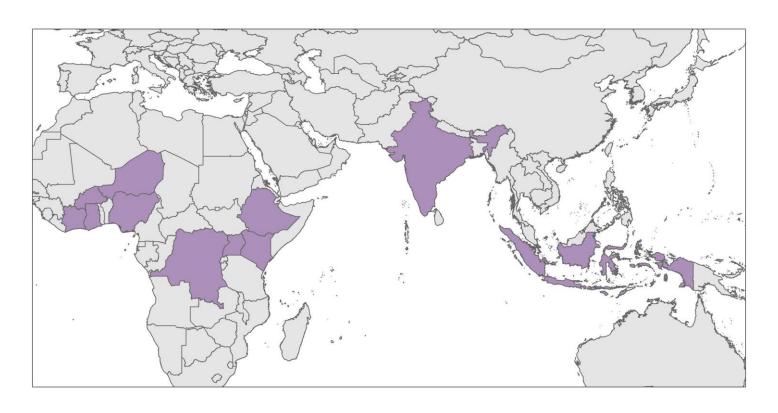

Performance Monitoring for Action (PMA)

- High frequency, recent surveys on family planning, sexual and reproductive health since 2013
- Data from 9 countries in Africa and Asia
- Originally designed to monitor progress towards FP2020 goals
- Funded by the Bill & Melinda Gates Foundation

200+ SAMPLES · 9000+ VARIABLES · 2 MILLION RECORDS

CHOOSE THE TOPIC FOR DATA BROWSING

MS.ORG

Household and Female

- Cross-sectional (2013-2018)
- Longitudinal and cross-section (2019-onward)
- Household
 - wealth, water, sanitation
- Female
 - Fertility, family planning, reproductive health

Topic Module

- Migration
- Gender-based
 Violence
- Economic empowerment
- Menstrual hygiene

- Health insurance
- Abortion
- Contraceptive Side
 Effects
- Contraceptive calendar

Service Delivery Point

- Same enumeration areas as surveyed households
- Family planning service provision
- Stock-outs
- Other health services
 - Antenatal, abortion, post abortion, post natal

COVID-19

- Phone survey in summer 2020
 - Burkina Faso, DRC, Kenya, Nigeria
 - Can be linked with longitudinal panel
- Information sources and trust level
- Health care access impacts
- Social distancing measures and attitudes

Maternal and Newborn Health

- Ethiopia cohort studies (2016- 2017 and 2019-2021)
- Antenatal care
- Pregnancy and delivery complications
- Infant health issues and treatment
- Infant vaccination

Client Exit Interviews

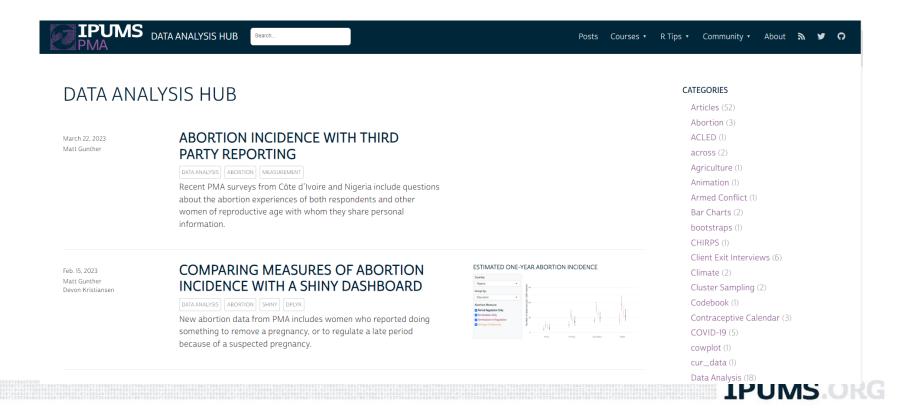

- Short interviews of family planning clients at health facilities
- Can be linked to facility data
- Method preference
- Quality of care
- Follow up interviews

Nutrition

- Burkina Faso and Kenya
- Children under 5 diet and biomarkers (MUAC)
- Household food security
- Antenatal nutrition
- Breastfeeding assistance

https://tech.popdata.org/pma-data-hub/

IPUMS International

HARMONIZED INTERNATIONAL CENSUS DATA FOR SOCIAL SCIENCE AND HEALTH RESEARCH

103 COUNTRIES — 547 CENSUSES & SURVEYS — OVER 1 BILLION PERSON RECORDS

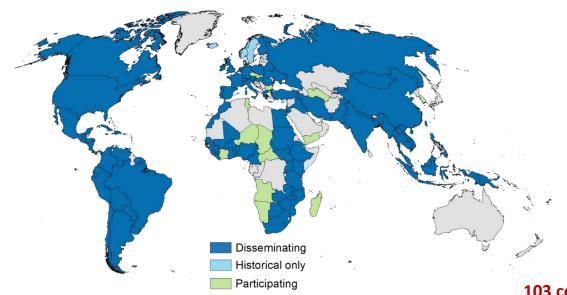

Features of IPUMS International

- Census (and survey) microdata samples
- Anonymized
- Harmonized with consistent coding
- Spatially harmonized geography and GIS files
- Data extract system with customizable extracts
- Online data analysis
- FREE access to researchers!

IPUMS microdata availability
